Activity-04

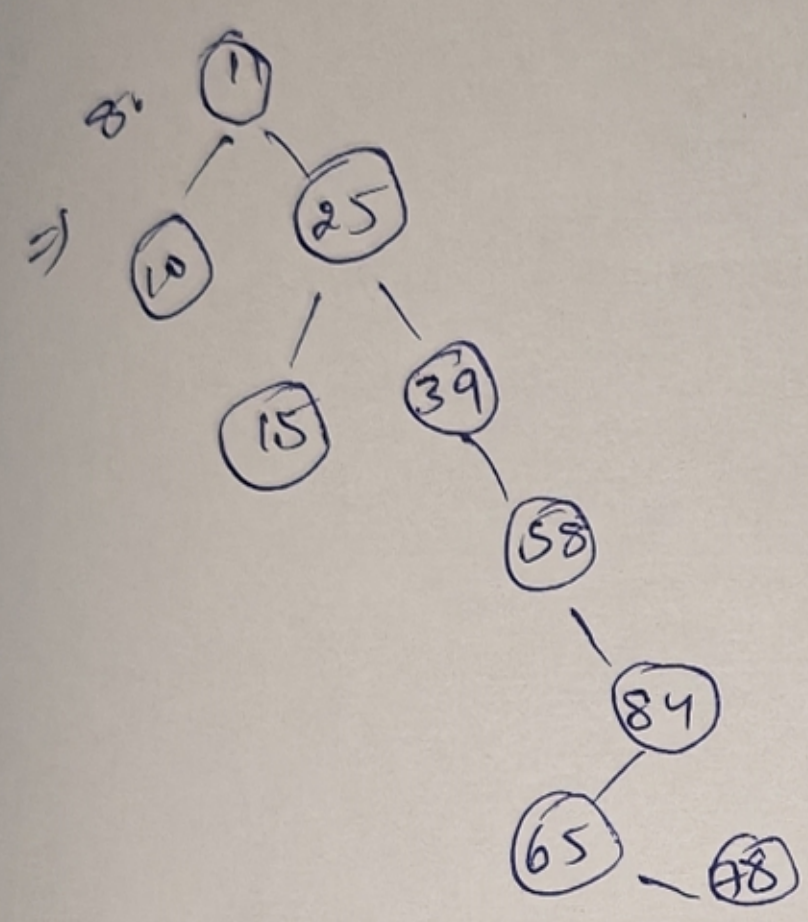

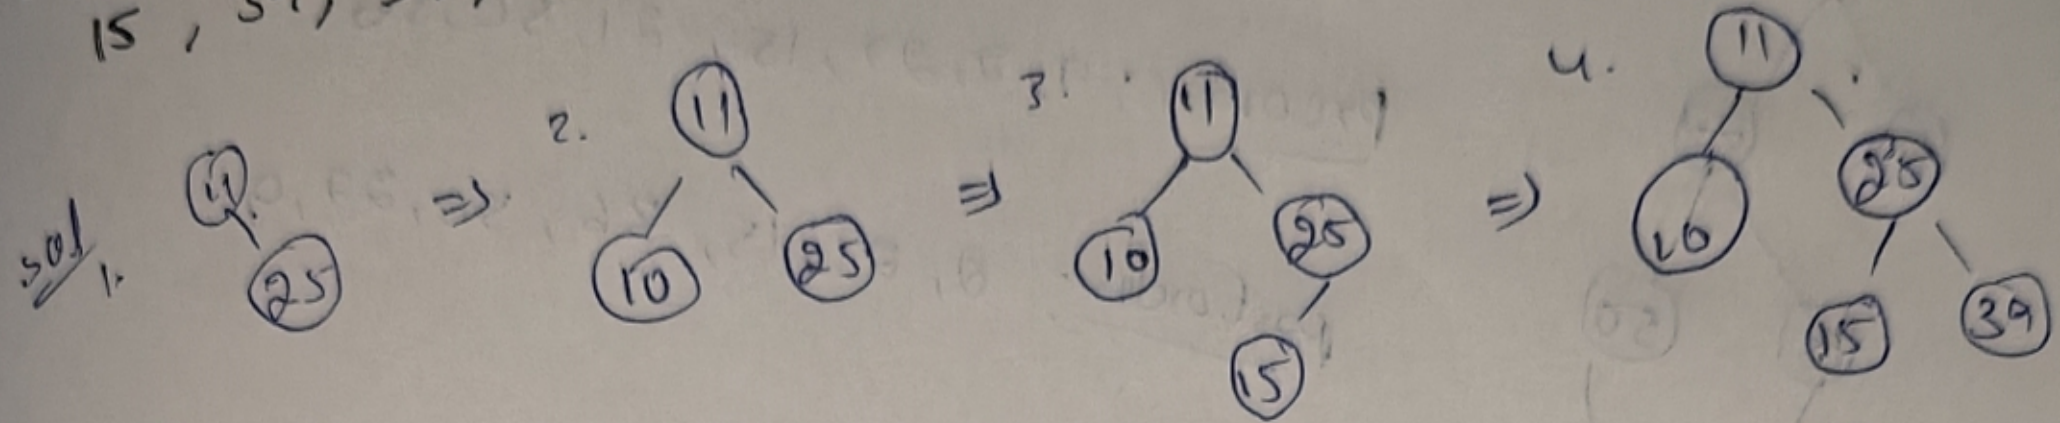

1. construct an AVL tree for following data
70, 50, 30, 90, 80, 130, 180 and apply deletion operation
of 120 and 30.

2) Create AVL tree using following data : 16, 27, 9, 11, 36, 54, 81, 63, 72

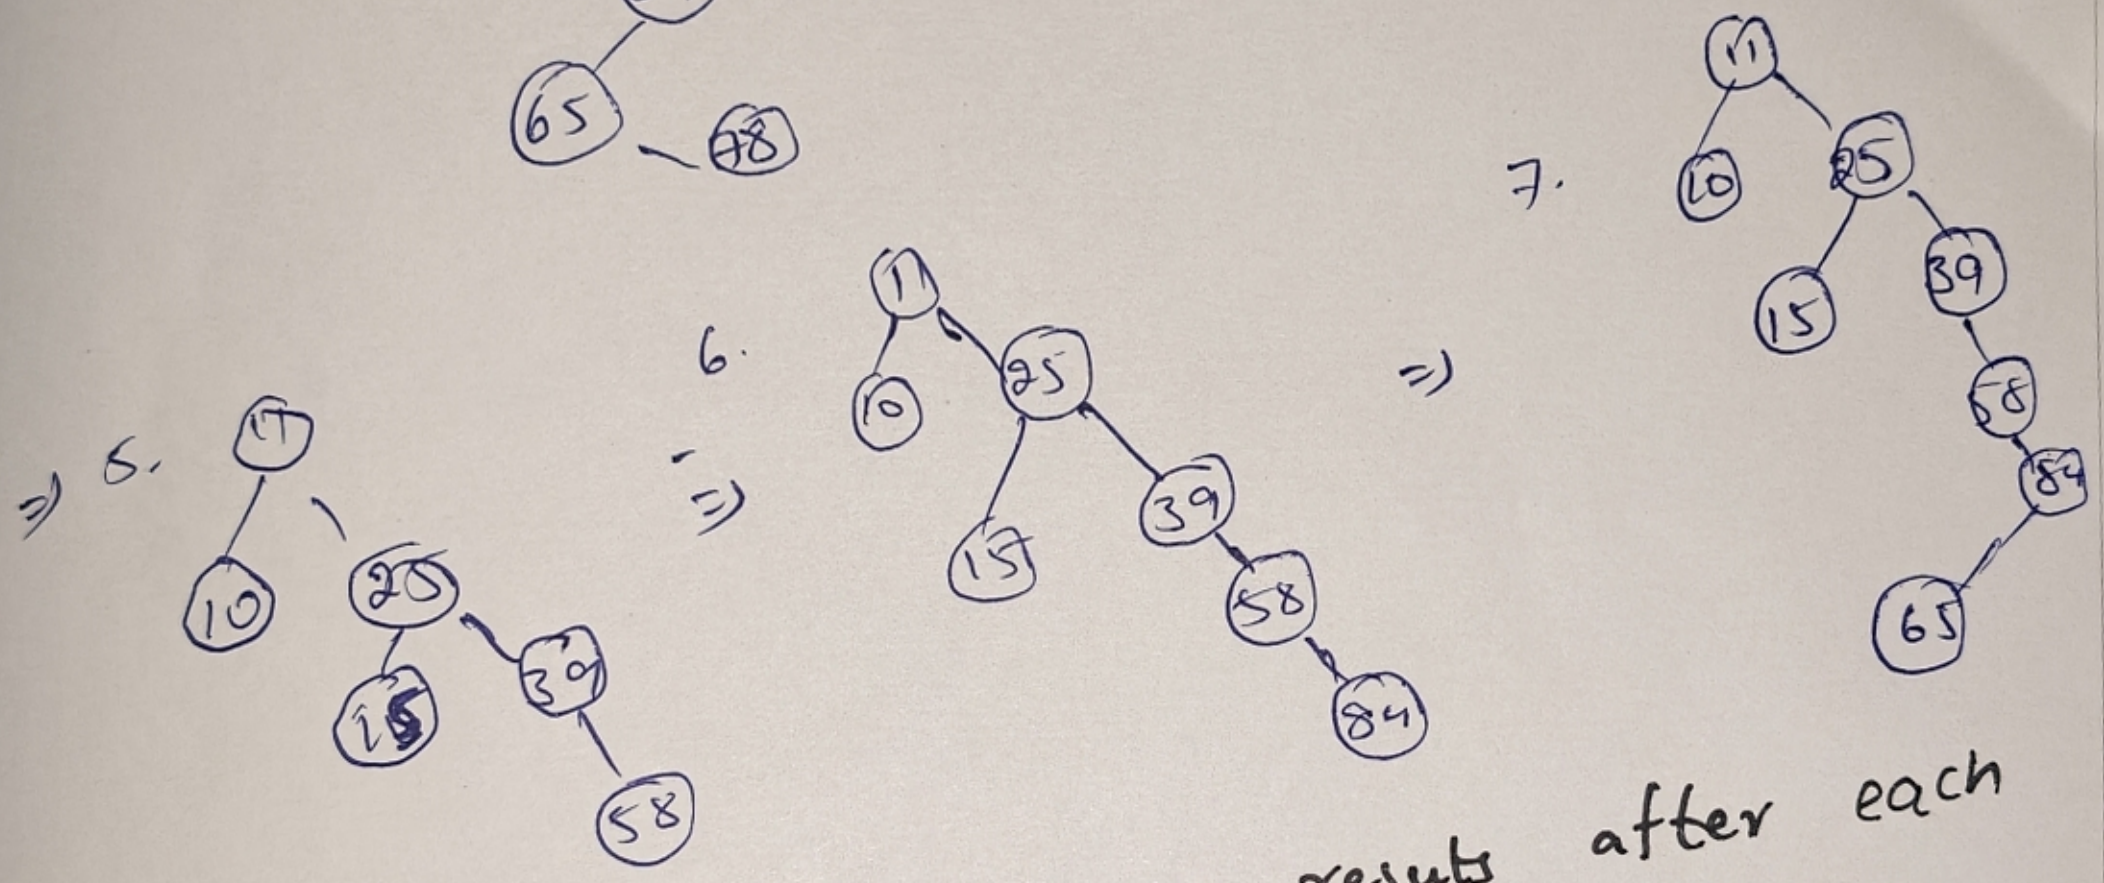

3) create binary search tree using data: 11, 25, 10, 15, 39, 58, 84, 65, 78

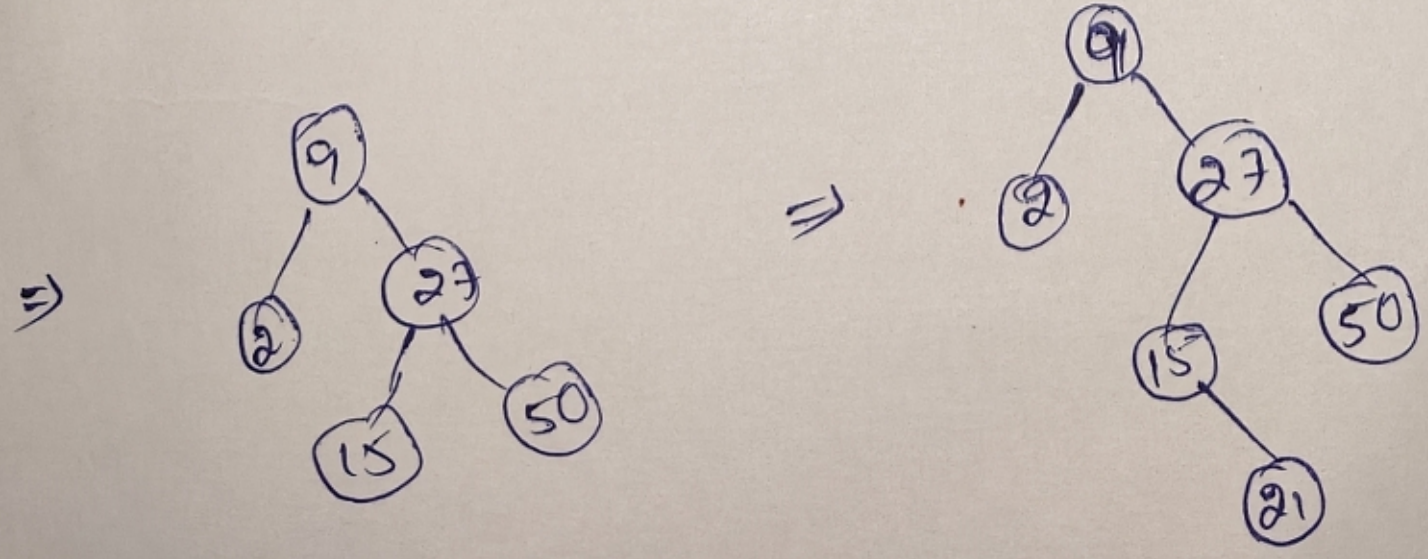

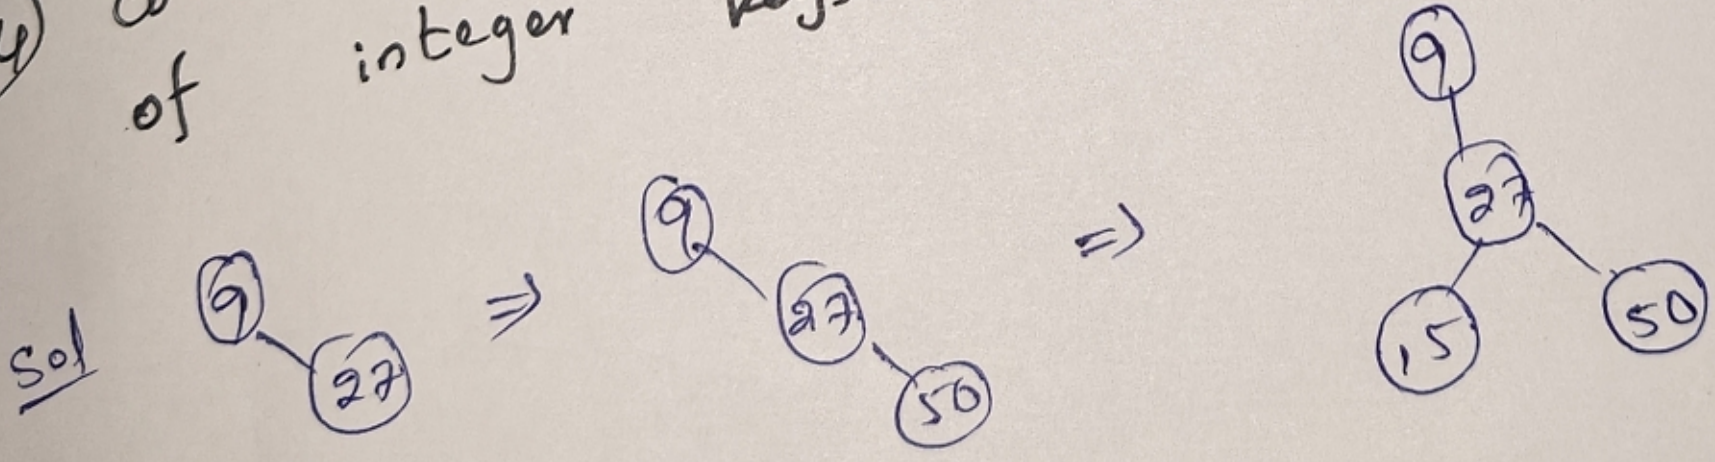

$\therefore$ Inorder: 10, 11, 15, 25, 39, 58, 65, 78, 84

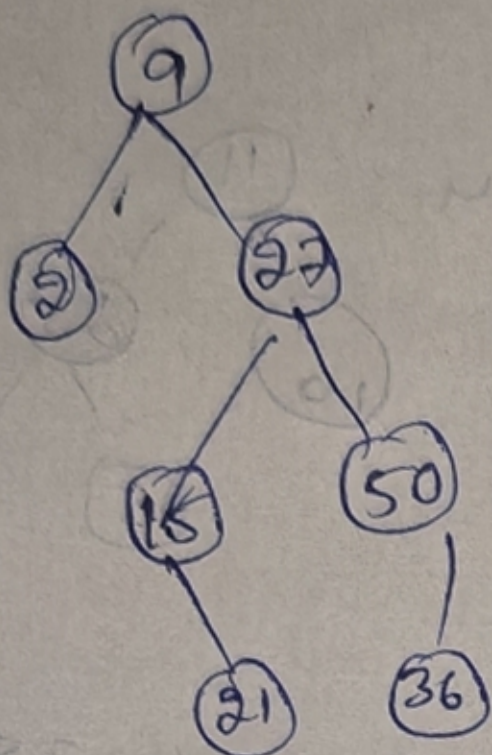

preorder: 11, 10, 25, 15, 39, 58, 84, 65, 78

postorder: 10, 15, 78, 65, 84, 58, 39, 25, 11

4) construct Binary tree that results after each of integer keys 9, 27, 50, 15, 2, 21 and 36

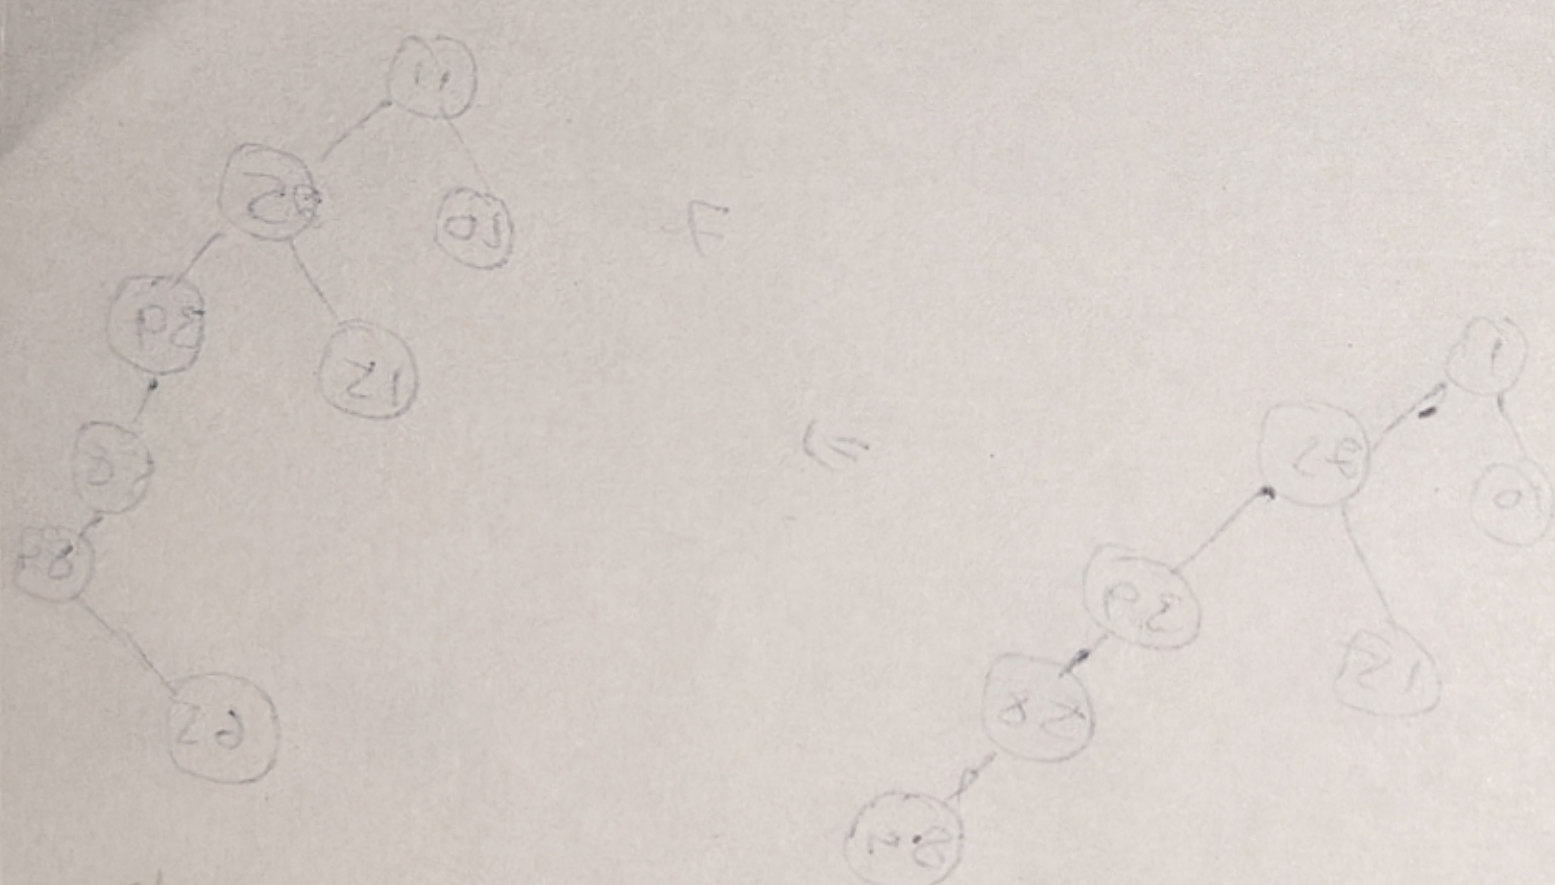

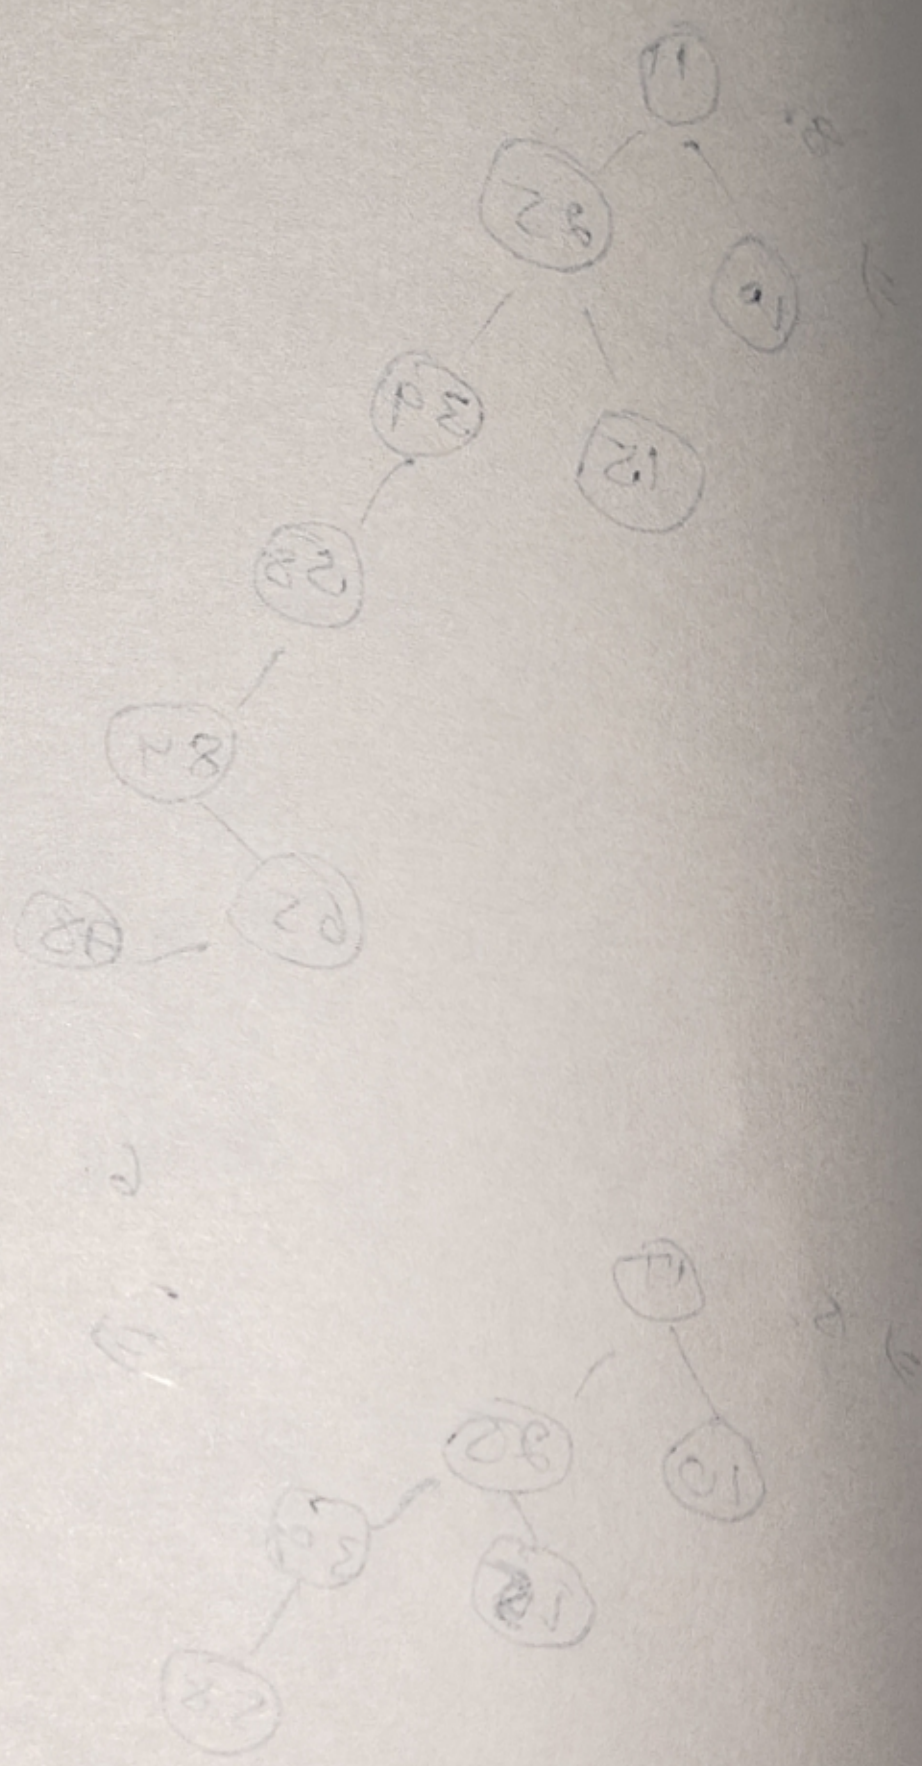

Inorder: 2, 9, 15, 21, 27, 36, 50

Preorder: 9, 2, 27, 15, 21, 50, 36

Postorder: 2, 21, 15, 36, 50, 27, 9

Handwritten notes and scribbles, including some faint text like "rebuild" and "BFS".

of construct Binary tree that result after each step
